```java
1 package application;
2 /**
3  * poco class for getting owe data.
4  * @author lokeshbudda
5  *
6  */
7 public class OweData {
8     private String oweUser;
9     private Double oweAmount;
10
11     public OweData(String oweUser, Double oweAmount) {
12         super();
13         this.oweUser = oweUser;
14         this.oweAmount = oweAmount;
15     }
16
17
18     public String getOweUser() {
19         return oweUser;
20     }
21     public void setOweUser(String oweUser) {
22         this.oweUser = oweUser;
23     }
24     public OweData() {
25         super();
26     }
```

```java
27      public Double getOweAmount() {
28          return oweAmount;
29      }
30      public void setOweAmount(Double oweAmount) {
31          this.oweAmount = oweAmount;
32      }
33
34 }
35
```
